b *Free school*: 'a school in which learning is given without pay' (J.)

It has been denied that this was the meaning of 'free (grammar) school', L. *libera schola grammaticalis*, as the official designation of many schools founded under Edw. VI. The denial rests on the two assertions (both disputable) that the Eng phrase is a translation of the Latin, not the reverse, and that *liber* could not mean 'gratuitous' in mediæval any more than in classical Latin Many different interpretations of the adj have been proposed (1) exempt from ecclesiastical control, (2) exempted by licence from the operation of the statute of mortmain, and hence entitled to hold property (to a limited amount), (3) giving a liberal education, (4) 'privileged' or 'authorized' We have failed, however, to find any example in which the interpretation 'gratuitous' is inadmissible (though the schools called 'free' were often gratuitous only to a select number or class of scholars), and there is abundant proof that this interpretation was already current *before* the time of Edw VI

Freemason (frī·me·sən, -s'n). [f FREE *a.* + MASON.

The precise import with which the adj. was originally used in this designation has been much disputed Three views

have been propounded (1) The suggestion that *free mason* stands for *free-stone mason* would appear unworthy of attention, but for the curious fact that the earliest known instances of any similar appellation are *mestre mason de franche peer*, 'master mason of free stone' (Act 25 Edw III st II c 3, A D 1350), and *sculptores lapidum liberorum*, 'carvers of free stones', alleged to occur in a document of 1217 (tr *Findel's Hist Mas* 51, citing Wyatt Papworth), the coincidence, however, seems to be merely accidental. (2) The view most generally held is that *free masons* were those who were 'free' of the masons' guild (see FREE *a* 29) Against this explanation many forcible objections have been brought by Mr. G W Speth, who suggests (3) that the itinerant masons were called 'free' because they claimed exemption from the control of the local guilds of the towns in which they temporarily settled. (4) Perhaps the best hypothesis is that the term refers to the mediæval practice of emancipating skilled artisans, in order that they might be able to travel and render their services wherever any great building was in process of construction]

†1 A member of a certain class of skilled workers in stone, in the 14th and following centuries often mentioned in contradistinction to 'rough masons', 'ligiers', etc They travelled from place to place, finding employment wherever important buildings were being erected, and had a system of secret signs and passwords by which a craftsman who had been admitted on giving evidence of competent skill could be recognized. In later use (16–18th c) the term seems often to be used merely as a more complimentary synonym of 'mason', implying that the workman so designated belonged to a superior grade *Obs.*

2 A member of the fraternity called more fully, *Free and Accepted Masons.*

Early in the 17th c., the societies of freemasons (in sense 1) began to admit honorary members, not connected with the building trades, but supposed to be eminent for architectural or antiquarian learning. These were called *accepted masons*, though the term *free masons* was often loosely applied to them; and they were admitted to a knowledge of the secret signs, and instructed in the legendary history of the craft, which had already begun to be developed The distinction of being an 'accepted mason' became a fashionable object of ambition, and before the end of the 17th c the object of the societies of freemasons seems to have been chiefly social and convivial In 1717, under the guidance of the physicist J T Desaguliers, four of these societies or 'lodges' in London united to form a 'grand lodge', with a new constitution and ritual, and a system of secret signs, the object of the society as reconstituted being mutual help and the promotion of brotherly feeling among its members The London 'grand lodge' became the parent of other 'lodges' in Great Britain and abroad, and there are now powerful bodies of 'freemasons', more or less recognizing each other, in most countries of the world

b. A war-vessel. In the Royal Navy, formerly a vessel of the class next in size and equipment to ships of the line, carrying from 28 to 60 guns on the main deck and a raised quarter-deck and forecastle. As now used, the term no longer denotes a distinct class of vessels, being often applied to ships of much larger size than those that were so designated early in this century.

Frill (fril), *sb*[1] [This and the related FRILL *v*[1] are of uncertain origin. The common view is that FRILL *v*[3], to shiver, gave rise to a sb. (see FRILL *sb*[3]) meaning 'the ruffling of a hawk's feathers when shivering', and that the word as applied to an article of costume is a transferred use of this But this hypothesis finds no support in the rare early instances of the words, and there is no proof that the sb. ever had the alleged sense. Sense 2 of the vb. suggests that it may be a metathetic form of FURL, but this is app. peculiar to Knolles, and should perh be regarded as an unconnected word. The sb as used by butchers (sense 3 below) is commonly regarded as a transferred sense from the 'frill' of a shirt; but the analogy of CHITTERLING and of F *fraise* (mesentery of a calf, 14th c; ruff, frill, 16th c) suggests the possibility that the butchers' sense may be the original (though not recorded until quite recently) Godef has one quot. for an OF. pple *freolé* (v r *freolet*) = 'frilled' (said of a shirt), and it is noteworthy that in the 17th c. the F. equivalent of FURL *v.* (cf FRILL *v*[1] 2) was *fresler*, which seems to belong to OF. *freseler* to frill, adorn, f *fresel, -ele*, dim. of *fraise* ruff; but it is not easy to see how Eng. *frill* can be connected with these words]

In ME. and in mod.E. the word seems to have been confused with others of similar sound . see the remarks under senses 1 and 4 below.

The OTeut type **(ga)furhiþjo*ⁿ would appear to be a collective f. **furhā* Fir, but there is no trace in Eng of the etymological sense 'fir-wood', and as firs seem to have been not very abundant in early times in this country, the development of the general sense 'wooded or waste land' must have taken place on the continent Cf., however, the mod Ger *forchdistel, forchgras, forchheide* (Grimm), which seem to contain a word that may be the source of med L *frocus* (OF *fron*) waste land, if so *fyrhðe* may be derived from it

With regard to the form-history in Eng , the reduced form *fyrðe* is represented by Firth *sb* [1], and with metathesis by *frith.* The fuller form *fyrhðe* is represented, with metathesis, by ME. *firhte*, mod Kentish *fright-wood*

The Welsh *ffrwd, ffrith*, often given as the etymon, are adopted forms of the Eng word

To the scanty evidence for the OE *fyrhðe* must be added the place-name Pirbright in Surrey, which in documents of 13th and 14th c appears as Pirifrith, Pirifright, Pirifrith, Purifright —OE. **Pirig-fyrhðe* pear-[1] frith' see *Cal Close Rolls* 1326 p 622, Manning & Bray *Surrey* I. 145, *Surrey Fines* (Surrey Archæol. Frog[1] (frŏg). Forms 1 **frogga**, 2–7 **frogge**, 4 **frock**, 5 **froke**, (4 **froge**, 5 **frugge**), 7 **frogg**, 5– **frog** *Pl* 2 **froggen**, 3 **wroggen**. [OE *frogga* wk masc; a hypocoristic formation (peculiar to Eng.), from the root contained in the various Teut. synonyms, of which there are three different types. (1) OE. *frox*, (**frosc**), *forsc* str masc. (see FROSH) = Du *vorsch*, OHG. *forsk* (MHG *vorsch*, mod G *frosch*), ON. *frosk-r* —O Teut **frosko-z*; (2) ME. *frūde*, FROUD, frog or toad, related by ablaut to ON *fraud-r*, OSw pl *frøddhr* (Da *frø*), cf. OF *froit*, *frot* toad, which is perh of Scandinavian origin, (3) ON *frauke*, whence perh. the ME *froke*, given among the forms of the present word

The etymological relation between the various Teut words involves some unsolved difficulties. Some scholars, on the ground of OE *frogga*, and ON *frauke*, assume a root ending in a guttural, and explain OTeut **frosko-* as = **frōh skо-* This does not account for the ME. *frūde*, ON *fraud-r*, and hence it has been suggested that the common root of all the words is *frud-* (*frod-*), *fraud-*, *frūd-*, OTeut. *frud-*+suffix *-ko-* would by phonetic law become **frosko-*, the ON *frauke* appears to be for **fraudke* With regard to OE *frogga* it may be remarked that the ending *-gga* occurs in several other names of animals: cf *stagga*, *docga*, *wicga* It is possible that *frogga* may owe its form to the analogy of other animal names with this termination

1. A tailless amphibious animal of the genus *Rana*, or, in wider sense, of the family *Ranidæ*.

The *Promp Parv.* (Norfolk, *c* 1440) explains *frogge*, *frugge* as meaning 'toad' (*bufo*), while the forms *froke* and *frosche* are said to mean 'frog' (*rana*). It is not known whether this distinction was recognised in the Norfolk dialect of the time, modern East Anglian glossaries do not mention it

Fude, obs. form of FEUD [1], FOOD

Fudge (*fʌ*dʒ), *int* and *sb* [Origin obscure

The int as used by Goldsmith (quot 1766) seems from the context merely to represent an inarticulate expression of indignant disgust, though later writers who adopted it from him use it with a more definite meaning The sb appears to have been developed partly from the int., and partly from FUDGE *v.* The etymology suggested in the annexed quot. 1700 can hardly be correct, though Captain Fudge, 'by some called Lying Fudge', (*Letter* of 1664 in Crouch *Posthuma Christiana* 1712, p. 87) was a real person (the surname is still common in Dorset) The nautical phrase 'You fudge it', associated in 1700 with the name of the mendacious captain, prob belongs to FUDGE *v* 1 In a dialogue of 1702, 'The Present Condition of the English Navy', one of the interlocutors is called 'Young Fudg of the Admiralty', perh. with allusion to the same verb

1700 *Remarks on the Navy* in D'Israeli *Cur Lit, Neology* (1841), There was, sir, in our time one Captain Fudge who always brought home his owners a good cargo of lies, so much that now aboard ship the sailors, when they hear a great lie told, cry out, 'You fudge it']

A *int* Stuff and nonsense! Bosh!

Fudge (*fʌ*dʒ), *v.* [app an onomatopœic alteration of FADGE *v.*, with vowel expressive of more clumsy action.]

1. *trans.* To fit together or adjust in a clumsy, makeshift, or dishonest manner; to patch or 'fake' *up*, to 'cook' accounts. Often in schoolboy language: To make (a problem) look as if it had been correctly worked, by altering figures; to conceal the defects of (a map or other drawing) by adjustment of the parts, so that no glaring disproportion is observed; and in other like uses. Cf. FADGE *v.* 3. Often with *up*.

-fuge (fiūdʒ), *suffix*, occurring in words (adj. and sb.) f. mod.L. types in *-fugus*. According to classical L. analogy, this ending should be connected with *fugĕre* to flee (cf. *profugus*), and should have the sense 'fleeing from' (cf *lucifugus*, *exifuga*). In the medical words *febrifugus*, lit driving away fevers, *vermifugus* expelling worms, however, the ending derives its sense from L *fugāre*, to put to flight. In imitation of the anglicized forms of these, nonce-wds in *-fuge* have occasionally been formed; chiefly on Lat stems, as Demonifuge (q v), dolorifuge, something to drive away pain; but occasionally on Eng words, as *mendacity-fuge*

1802–12 Bentham *Rationale of Judic Evid* (1827) V. IX IV 429 In all purely pecuniary cases, to which the virtue of the mendacity-fuge diaphoretic does not extend. 1891 T Hardy *Tess* I 86 The children .had made use of this idea as a species of dolorifuge after the death of the horse

Ful, obs. form of Foul.

-ful, *suffix*, originally identical with Full *a.*

1. Forming adjs. In OE the adj. *full*, like its equivalent in the other Teut. langs., was used in composition with a preceding sb., forming adjs, the etymological sense of which (= 'full of') is usually somewhat weakened, so that the words may be rendered 'having', 'characterized by' (the attribute denoted by the sb), the meaning of the suffix thus differs little from that of L. *-ōsus*, -ous In ME and in mod.E. many new formations of this type have arisen, some of them from Romanic sbs, as *beautiful, graceful*; and the suffix is still to some extent productive In the 14th c. a few new forms arose in which the suffix had the force of 'possessing the qualities of', e. g *masterful, manful* In OE *-full* was not ordinarily appended to adjs., an instance occurs in *deorcfull*, Darkful, used to render L. *tenebrosus*, and prob formed in imitation of it In the 16th and 17th c a few new words appear f adjs or L adj stems + *-ful*, e.g *direful, grateful, tristful, fierceful*; prob these were due to the analogy of older synonyms having this suffix, though it is possible that they may have been in part suggested by It words like *gratevole* (*gradevole*), the ending of which has an accidental resemblance to the Eng. suffix As the sbs. to which *-ful* is appended are often nouns of action or state coincident in form with the stems of related vbs, it happens frequently that a word really f a sb + *-ful* is associated in ordinary apprehension rather with the vb than the sb (For this there are sometimes special causes, e g. the sb *thank* being obsolete in the sing while *thank* vb. is current, the adj *thankful* is naturally viewed as a derivative of the latter.) Hence in mod.Eng adjs. in *-ful* are sometimes formed directly on verb-stems, the sense of the suffix being 'apt to', 'able or accustomed to', as in *assistful, distractful, crossful, mournful*, an example of a passive sense (= *-able*) occurs in *bashful.*

2. Forming sbs In the Teut. langs the form of expression in which a sb. denoting a receptacle is followed by the adj Full in concord with it and governing a genitive (e g 'a hand full of corn') was used, not only in its proper sense, but in the transferred sense of 'the quantity that fills or would fill' (the receptacle), see Full *a* 1 b The ambiguity thus arising is partly obviated by a differentiation of form; the sb and adj. are treated as independent words when they retain their proper sense, but as forming a compound when the sense is transferred. This differentiation has not been carried out to an equal extent in the various langs. In Ger, *handvoll* 'handful', *mundvoll* 'mouthful' are written as single words, but this makes no real difference in their syntactical value; the gender of the quasi-compound is determined by that of its first element, and there is no inflexion In OE. the development had proceeded a step further in the case of *handfull*, which, although retaining the fem. gender of *hand*, was so completely one word as to be declinable (accus *-fulle*, pl. *-fulla*, after the prevailing declension of feminines); in the 14th c the pl. was *handfullis*. No other compound of this class is found in OE.; commonly the notion was expressed in the original Teut manner by the adj *full* in concord with the sb. This continued also in ME., but owing to the practice of using the sing of a noun of quantity instead of the pl. after a numeral, there is seldom any evidence to show whether the ME antecedent of a word like *dishful* is to be regarded as a syntactical combination or as a single word In mod.Eng *-ful* has become a suffix forming derivatives with the general sense 'quantity that fills or would fill' (something), and may be attached at pleasure to any sb denoting an object that can be regarded as holding or containing a more or less definite quantity of anything; thus we have not only *bottleful, boxful, canful, spoonful*, etc, but *bookful, churchful, houseful, worldful*, etc. The plural forms *spoonsful, cupsful*, etc, which are still sometimes heard, represent either a survival of, or (much more probably) a return to, the older grammatical view, but though they have thus some appearance of historical justification, they are contrary to good modern usage, and are objectionable on account of their ambiguity.

The ON *-fyllr* (*handfyllr* handful, *munnfyllr* mouthful, etc.) is not identical with the Eng suffix, but is the sb *fyllr* fem = Fill *sb*[1], and the compounds are therefore all fem, whatever the gender of the first element.
